Here are some ideas to bring The Daily Mile back into the classroom with Digimap for Schools.

Find your school playground/playing field using the postcode or placename search, then zoom in for amazing detail. The map will show your school building footprint, you'll probably even be able to make out where your classrooms/doors out to the playground are positioned. You'll see paths/tracks in your playing fields.

Use the draw line tool to draw the route you take – click once on screen to start and then click every time you need to change direction to plot your route then double click to finish. You can change the colour, thickness and style of line.

Use the Add Measurement tool to click on the line you've drawn and find out the distance your pupils have run!

To annotate your map a little more why not use the text box and text label tool to add information to the map, perhaps a lovely piece of wildlife or warning where there is too much litter. You could even tie this up with your EcoSchool tidy up!

If you'd like a different perspective of what you're looking at then use the layer picker to fade away the Ordnance Survey map and show the aerial photography – you will see your school roof!
Our Daily Mile Route

0.46 mi

734.41 m

start

Ravenswood Primary School

finish

our route is nearly half a mile or nearly 735 metres, wow!!

it can be a bit muddy here!

there can be lots of litter here :(

this is our favourite place in our Daily Mile because sometimes we see robins and blackbirds in the trees
